Digital Recording-based Interview Rooms with LAN Connectivity

SpectraTek's Interview Room Installations feature easy-to-use equipment that provides high-quality audio and video for use as evidence in a court of law.

Each interview room system is custom designed to meet your department's unique needs.

High-resolution cameras are positioned for coverage of all room activity and to capture the subject's facial expressions, and high-gain microphones provide superior intelligibility of conversations.

Individual DVR recording channels provide independent file saving to DVD and USB.

Software and storage capabilities allow multiple recording functions, including bookmarks and viewing privileges for case information security.

View multiple interview rooms from any location on the network.

Interview Room Standard and Optional Features

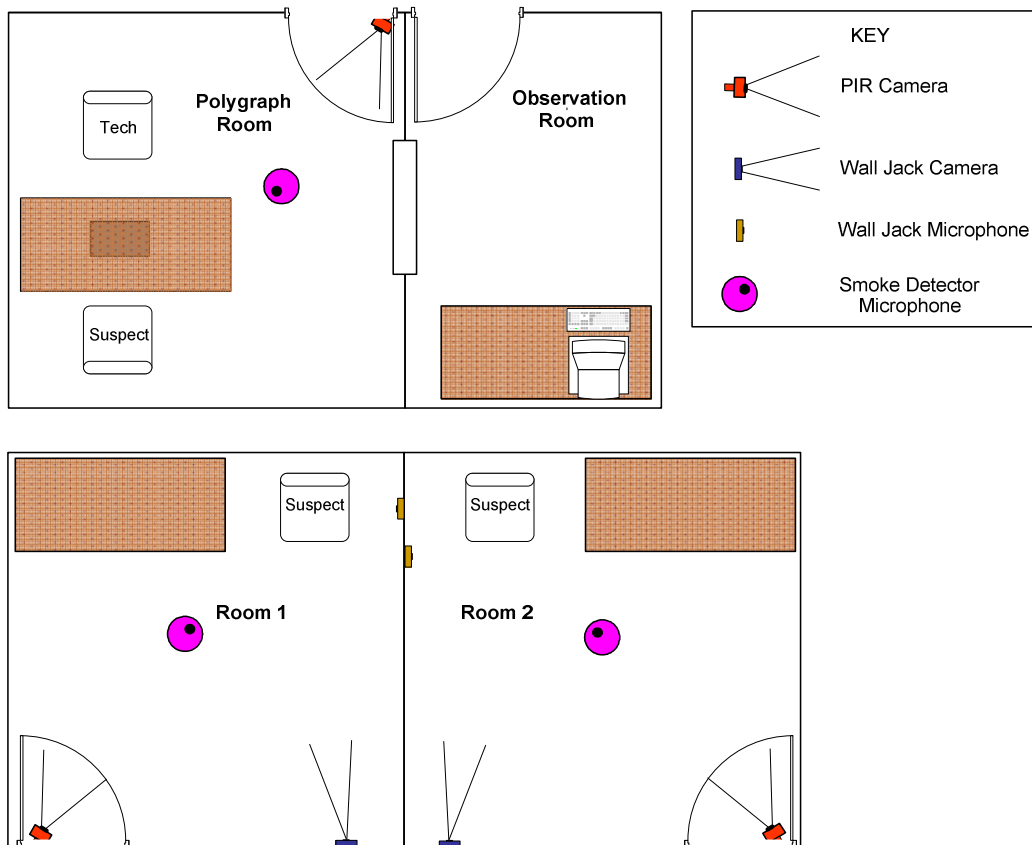

- A wide variety of camera and microphone choices are available to suit your unique installation needs
- High-resolution video cameras and monitors
- High-resolution viewing and recording with H.264 format video compression
- HDMI 1080p video output
- High-gain microphones provide superior intelligibility of conversations
- Embedded watermark to ensure authentication
- Recorded files are read-only to prevent over-recording loss
- Date and time stamp imprints the time of recording for each video frame
- Audio mixers enable manual adjustment of audio balance
- Headphone amplifiers enabling audio monitoring by several observers
- User friendly interface provides your department with the capability to record and store digital multimedia evidence

Interview Room Standard and Optional Features, continued

- View multiple interview rooms from one or multiple locations on the network
- Security controls for safe storage and easy user-defined video viewing access
- Remote viewing over one, two, or more camera configurations from multiple locations
- Multiple microphone configurations provide complete, crystal clear audio
- DVRs support AVI or WMV offload for easy video sharing, including DVD and USB drives
- DVD-R removable video media or direct Ethernet connection to server upload manager
- Covert camera and microphone installation to capture verbal and non-verbal facial and bodily expressions and movements with high-resolution video and audio
- Software allows bookmarks / annotation and flagging interviews as they are recorded
- Picture-in-picture function allows close view of the subject within room view
