Tactical Repeater Command Unit with Covert Cell Phone Input and P25 Radio Relay Connectivity

The SpectraCom 245 is a tactical unit that combines an integral cellular base phone, digital voice recorder, and a connected department P25 radio to produce a portable listening post for the included SpectraTek STC Series Covert Cellular Phone.

The cellular base phone transmits to, and receives calls from the covert cellular phone, and can record these calls to the on-board digital recorder.

The department-supplied P25 radio can, upon operator command, relay these calls to back-up support personnel via their P25 department radios.

SC 245 Features
