Pole Cam with Pan/Tilt/Zoom Video in Utility Box Enclosure over High-Speed Cellular Network

SpectraTek's SP 955 Tactical Video Surveillance System provides extended duration, short-to-long range video surveillance in a covert weather-tight enclosure that can be mounted to a pole or wall, simulating a common cable, telephone or utility box. The unit can be controlled remotely from any location via a computer, tablet or phone.

Features

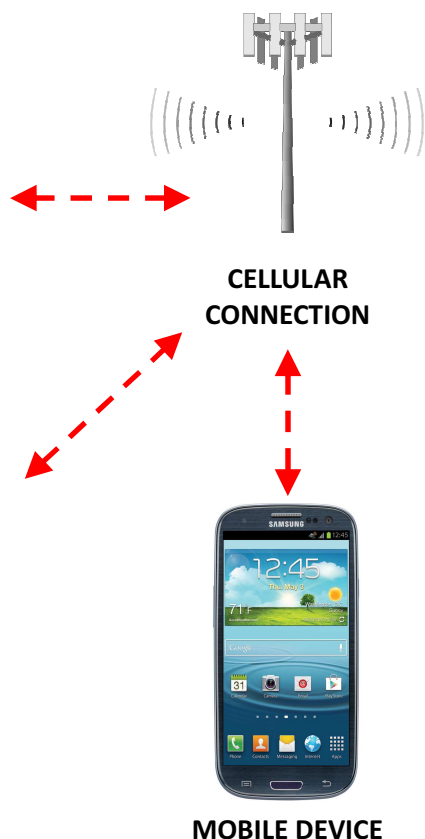

- Covert video deployment over 4G LTE high-speed cellular network in the field.
- No waiting for the phone or cable company to connect the system.
- Control and viewing are in real time, allowing immediate access to all authorized team members on mobile devices.
- Intuitive user software for ease of use.
- Includes an IP camera with PTZ lens which allows for maximum pan and tilt within a narrow window opening.
- Variety of cameras available to meet specific customer requirements.
- Optional Field Video Recorder with system to record video on site in full resolution and quality for evidence collection.

POLE MOUNT UTILITY BOX

COMPUTER AT HQ

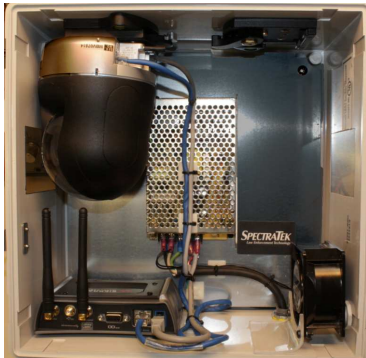

SP 955 Video Surveillance System

Benefits

- Remote covert surveillance is now a cost-effective alternative to manned ops with the advent of the SP 955.
- Quick deployment is assured as no waiting for a cable or phone company connection is required.
- Designed into a weather-tight enclosure that can be mounted to a pole or wall.
- Remote PTZ control and video transmission from the camera are sent via the 4G LTE high-speed cellular network modem link.
- All camera functions can be remotely adjusted to maximize video quality.
- The SP 955 provides a cost-efficient solution by using remote video to reduce on-site surveillance man power with a wireless video surveillance system tailored to your department's unique needs.

SP 955 Pole Cam Utility Box System

- Quick setup without waiting for cable or phone company access.
- Controlled remotely from any location via a computer or mobile device.
- All camera functions can be remotely adjusted to maximize video quality.
- The system includes a 4G wireless modem providing secure and reliable cellular connectivity.
- Multiple camera options available to meet specific operational requirements.
- Optional WiFi access available.
- Housed in an industrial-grade utility box for all-weather missions.
- The camera and modem are portable for use with both the SP-949 Window/Tripod Mount and the SP 955 Pole Cam systems.
- Service available for AT&T or Verizon networks.

Computer with Video Management Software

- The system computer features integral easy-to-use video management software for camera control, recording, and monitoring of clear high-definition evidence-grade video surveillance.
- Intuitive user software can be installed on a desktop or laptop computer.
- The control and viewing are in real time, allowing immediate access to all authorized team members on mobile devices to monitor or control viewing.
- Face Detection and License Plate Recognition capable.
- Motion detection recording action trigger.
